

Installation de R et RStudio

Il faut commencer par installer **R** avant d'installer **RStudio** qui est une interface additionnelle de R.

Installation de R

Pour une installation sous **Windows**, se rendre sur cette page :

<http://cran.r-project.org/bin/windows/base/>

puis suivre le premier lien pour télécharger le programme d'installation.

R-4.0.4 for Windows (32/64 bit)

Download R 4.0.4 for Windows (85 megabytes, 32/64 bit)

[Installation and other instructions](#)
[New features in this version](#)

If you want to double-check that the package you have downloaded matches the package distributed by CRAN, you can compare the [md5sum](#) of the .exe to the [fingerprint](#) on the master server. You will need a version of md5sum for windows: both [graphical](#) and [command line versions](#) are available.

Frequently asked questions

- [Does R run under my version of Windows?](#)
- [How do I update packages in my previous version of R?](#)
- [Should I run 32-bit or 64-bit R?](#)

Please see the [R FAQ](#) for general information about R and the [R Windows FAQ](#) for Windows-specific information.

Other builds

- Patches to this release are incorporated in the [r-patched snapshot build](#).
- A build of the development version (which will eventually become the next major release of R) is available in the [r-devel snapshot build](#).
- [Previous releases](#)

Note to webmasters: A stable link which will redirect to the current Windows binary release is
`<CRAN_MIRROR>/bin/windows/base/release.html`

Last change: 2021-02-15

Une fois le programme d'installation lancé, il suffira d'installer **R** avec les options par défaut

Pour **Mac OS X**, les fichiers d'installation sont disponibles à :

<http://cran.r-project.org/bin/macosx/>

R for Mac OS X

This directory contains binaries for a base distribution and packages to run on Mac OS X (release 10.6 and above). Mac OS 8.6 to 9.2 (and Mac OS X 10.1) are no longer supported but you can find the last supported release of R for these systems (which is R 1.7.1) [here](#). Releases for old Mac OS X systems (through Mac OS X 10.5) and PowerPC Macs can be found in the [old dir](#).

Note: CRAN does not have Mac OS X systems and cannot check these binaries for viruses. Although we take precautions when assessing downloaded executables, users should adjust the risk accordingly.

Package binaries for R versions older than 3.2.0 are only available from the [CRAN archive](#) so users of such versions should adjust the risk accordingly.

R 4.0.4 "Lost Library Book" released on 2021/02/15

Please check the SHA1 checksum of the downloaded package in the `Terminal` application to ensure the SHA1 checksum matches the one in the `NEWS` file.

R 4.0.4 pkg (notarized and signed)
SHA1 hash: 2c791611028000087c1f541882200a0b8
(URL: [R404.pkg](#))

R 4.0.4 binary for macOS 10.13 (High Sierra) and higher, signed and notarized package. Contains R 4.0.4 framework, Rapp GUI 1.74 in `bin` and `lib` subdirectories. The latter two components are optional and can be omitted when choosing "custom install", they are only needed if you want to use the `tex` package or build package documentation from sources.

Note: the use of X11 (including `tex`) requires [XQuartz](#) to be installed since it is no longer part of OS X. Always re-install XQuartz when upgrading your macOS to a new major version. Also please do not install beta versions of XQuartz (even if offered).

This release supports Intel Macs, but it is also known to work using Rosetta2 on M1-based Macs. Native Apple silicon binary is expected for R 4.1.0 if support for Fortran stabilizes, for experimental builds and updates see [mac R-project.org](#).

Important: this release uses Xcode 12.4 and GNU Fortran 8.2. If you wish to compile R packages from sources, you will need to download GNU Fortran 8.2 - see the [tools](#) directory.

News features and changes in the Rapp Mac GUI

Sources for the Rapp GUI 1.74 for Mac OS X. This file is only needed if you want to join the development of the GUI, it is not intended for regular users. Read the `INSTALL` file for further instructions.

NEWS (for Mac GUI)

Note: Previous R versions for El Capitan can be found in the [el-capitan/base](#) directory.

Binaries for legacy OS X systems

R 3.6.3.pkg (signed) SHA1 hash: 4562d0170d54773058401024012303557d (ca. 775MB)	R 3.6.3 binary for OS X 10.11 (El Capitan) and higher, signed package. Contains Macos, Tcl/Tk 8.6.6 X11 libraries and Texpinfo 5.2. The latter two components are optional and can be omitted when choosing "custom install", it is only needed if you want to use the tcltk R package or build package documentation from sources.	Pour macOS 10.11 et 10.12
R 3.3.3.pkg MD5 hash: 893ba010f0303e666e1906e480071bf (ca. 71MB)	R 3.3.3 binary for Mac OS X 10.9 (Mavericks) and higher, signed package. Contains R 3.3.3 framework, R.app GUI 1.69 in 64-bit for Intel Macs, Tcl/Tk 8.6.0 X11 libraries and Texpinfo 5.2. The latter two components are optional and can be omitted when choosing "custom install", it is only needed if you want to use the tcltk R package or build package documentation from sources.	Pour macOS 10.9 et 10.10
R 3.2.1-snowleopard.pkg MD5 hash: 4862d01131405477060c0914685 (ca. 68MB)	R 3.2.1 legacy binary for Mac OS X 10.6 (Snow Leopard) - 10.8 (Mountain Lion), signed package. Contains R 3.2.1 framework, R.app GUI 1.66 in 64-bit for Intel Macs.	Pour macOS 10.6 à 10.8

Note: the use of X11 (including tcltk) requires [XQuartz](#) to be installed since it upgrading your OS X to a new major version.

The new R.app Cocoa GUI has been written by Simon Urbanek and Stefano Iacus with contributions from many developers and translators world-wide, see "About R" in the GUI.
